

WHO CAN APPLY

Faculty members/ PG students/ Research scholars from Engineering Colleges and practicing engineers from industry are eligible to apply for the course. No registration fee is charged for the participants. Eligible participants will be selected on the basis of first come first served. On completion of the course, an objective assessment will be done and certificates will be awarded to successful participants by ATAL academy.

GUIDELINES

Faculty Development Program comprises of 13 sessions. Timing will be from 6:00 pm to 9:00 pm. The FDP will be conducted in the online mode with two sessions per day. On the last day of the course, there will be an objective assessment test. Digital certificate by ATAL Academy will be awarded to participants who have an attendance of more than 80% and score more than 60% in the test.

HOW TO APPLY ?

There is no registration fee. All participants are requested register using the link of AICTE ATAL portal: <https://atalacademy.aicte-india.org/signup> Find this FDP under Workshops. The following filters may be applied:

(Dt. 24.02.2025 to 01.03.2025)

Organized by
Department of Mechanical Engg.

Indira Gandhi Institute of Technology
(An Autonomous Institute of Govt. of Odisha)
Sarang, Dhenkanal
Odisha - 759146

ABOUT THE INSTITUTE

Indira Gandhi Institute of Technology (IGIT), Sarang was established in the year of 1982 and was managed directly by the Govt. of Odisha in the name of Odisha College of Engineering (OCE). Prior to this, since 1981, the institute in the name of Modern Polytechnic (MPT) was offering Diploma Courses in Civil, Electrical, Mechanical, Mining Survey Engineering. In the year 1987, both OCE & MPT were merged and renamed as IGIT, Sarang and the management was transferred to an Autonomous Society.

Presently, the Institute is offering nine Under Graduate Engineering courses in Civil, Chemical, Electrical, Mechanical, Metallurgical, Electronics & Telecommunication, Computer Science Engg., Production Engg., & two part-time Post Graduate Engg courses in Industrial Power Control & Drives, Environmental Sc. & Engg.; nine full time Post Graduate Engg courses / Master course Computer Sc. Engg., Electronics and Telecom. Engg., Geotech Engg., Mechanical System Design, Mett. & Materials Engg., Power Electronics & Drives, Power System Engg., Production Engg., Structural Engg., Master in Computer Application.

ABOUT THE DEPARTMENT

B.Tech programme in Mechanical Engineering was introduced in the Institution in 1982. Since its inception, the Department of Mechanical Engineering is actively engaged in grooming a large pool of students into well trained engineers. The department has well equipped labs and highly qualified faculty and staff. The department keeps pace with the advances in technology by engaging in research and consultancy works in the various fields of Mechanical Engineering.

BROAD OBJECTIVES

Organizing a Faculty Development Program (FDP) on Sustainable Manufacturing and Advanced Automation in Industries aims to equip educators, researchers, and industry professionals with the latest knowledge and skills needed to foster innovation and sustainability in manufacturing processes. Key objectives of the FDP include:

- To promote Sustainable Manufacturing Practices
- To familiarize Participants with Advanced Automation
- To bridge Academia-Industry Collaboration
- To encourage interdisciplinary research and development of innovative solutions to industrial challenges.
- To encourage faculty members for the development of specialized courses or modules focused on these emerging areas.
- To discuss real-world challenges industries face in adopting sustainable practices and automation.

TOPICS COVERED IN FDP

- Reverse supply chain, industrial engineering and robotics
- Stress analysis, composite materials, thermal spray coating and tribology
- Condition monitoring and reliability
- Free space optics, fiber optic communication, IsOWC system, non-linear optics and digital communication
- Thermal and fluid engineering, industrial boilers and fired furnaces, bio-mechanics and robotics
- Product development, IPR development, destructive and nondestructive testing of mining and allied equipment
- Composite materials, tribology, modelling and simulation, biomaterials and metal casting
- Mechanical properties, mechanical behavior of materials and failure analysis
- Process engineering, modeling, simulation, optimization and hysis
- Six Sigma, SAP products and supply chain management
- Design, development, aerodynamic applications
- IT strategy, solution architecture, requirement analysis, software project management, cyber security and global delivery
